

METSyS NEC 220 Logger Firmware Upgrade Instructions To Version 01.11

Introduction / Background

The METSyS NEC 220 Logger firmware version 01.11 increases the maximum current range of the logger from 2500A to 4000A. There is no need to re-calibrate the logger after the update.

Firmware Update Instructions

1. To perform the update connect the loggers external power supply and ensure that the battery is charged.
2. Copy the **UPDATE.BIN** file into the top-level directory of a USB memory stick. Insert the memory stick into the logger and select **FIRMWARE UPDATE** from the logger Menu.
3. Turn the METSyS logger OFF and then back ON and verify that the firmware version is ` on the initial turn-on screen.
4. The Excel NEC REPORT GENERATOR macro file will need to be version **01_12.xlsm** or later to be compatible with the new 4000A current range.
